

Spezial-Kombi K2 6430/K2

Features

Spezial-Kombi K2 6430/K2 is a diagonally braided packing made from graphite-incorporated PTFE combined with a running surface reinforcement of endless aramid fibers (Kevlar). The Spezial-Kombi K2 is a special packing for applications with high pressures and sliding velocities.

Key physical characteristics

Operating temperature min. [°C]	-100,00
Operating temperature max. [°C]	250,00
Medium pressure max. [bar]	25 P
Speed rotating [m/s]	20,00
suitable for pH value	1-13
P*V factor	200,00

All technical specifications are based on extensive tests and our many years of experience. The diversity of possible applications, however, means that they can serve only as guide values.

We must be notified of the exact conditions of application before we can provide any guarantee for a specific case. This is subject to change.
